

REMARKS

Claims 1 through 30 are pending in this application. Claims 8 through 14 were allowed. The specification has been amended to indicate the application numbers of the applications that are cross-referenced in paragraph one.

However, claim 1 was objected to because of informalities: the Office Action indicated that the long sentence impeded a clear understanding of the claim. Accordingly, claim 1 has been amended in a manner that is intended to allow a clearer understanding of the claimed subject matter.

Claim 30 was provisionally rejected under 35 U.S.C. § 101 as claiming the same subject matter as that of claim 5 of co-pending United States Patent Application No. 10/635,793 ("the NWISP043 Application"). Claims 15 and 16 through 29 were provisionally rejected on the ground of non-statutory obviousness-type double patenting as being allegedly unpatentable over claims 1 through 4 and 16 of the NWISP043 Application. Accordingly, claim 30 has been amended so that it no longer claims the same subject matter as claim 5 of the NWISP043 Application. A Terminal Disclaimer is being filed herewith regarding the NWISP043 Application.

Claims 1 and 15 were also provisionally rejected on the ground of non-statutory obviousness-type double patenting as being allegedly unpatentable over claims 1 and 18 of co-pending United States Patent Application No. 10/635,744 ("the NWISP042 Application"). A Terminal Disclaimer is also being filed herewith regarding the NWISP042 Application.
